Short Course On

Leadership in Turbulent Times: Managing Complexity in Global Supply Chain

15-17 January 2024
The Business School
Edinburgh Napier University

Organized by

Management Subject Group
The Business School
Edinburgh Napier University
219 Colinton Rd, Edinburgh EH14 1DJ
Edinburgh Napier University

COURSE OVERVIEW

Global supply chains are inherently risky and complex. The complexity in the supply chain is further accentuated by factors such as globalisation, outsourcing, natural (e.g., Covid-19) or manmade (e.g., Ukraine War) disasters, and climate change. Leaders in today's organisations struggles to manage increasing complexity of global supply chain. Hence, this course is aimed at addressing this gap and is designed to answer questions such as how to lead in turbulent times. What can business leaders do to manage complexity in their respective supply chains? How to prepare for uncertainty, incorporate sustainability into the supply chain, and build resilient enterprises that can successfully navigate in this testing time?

WHO SHOULD ATTEND?

The course is designed to cater for a wide variety of audiences.

- Mid to senior-level managers working in various areas (e.g., procurement, demand planning, supplier management, operations, production, distribution, and logistics) of a supply chain.
- Both new and seasoned entrepreneurs will also benefit from the course.
- Policymakers and participants from government or non-government organisations who wish to learn how a supply chain works and how decisions are made within the global supply chain can also join this course.

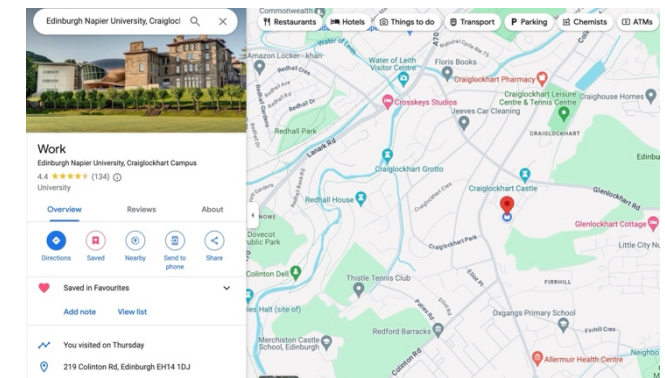

SCHEDULE

Day 1	
Time	Agenda
9:30-10:00	Meet & greet
